Fantastic! ORC works with Chris and Rebecca a lot on NEPA issues, so that will be great. I'm off for the next 2 days to try to rejuvenate so will be back in the office on Monday...

Hi Erin,

That would be great to have a NEPA staff person to work with.

In the air program, Christopher Razzazian helped me a lot with the air section of the CEA. Rebecca Matichuk helped with the air modeling summaries. Powertech had some comments on the air section of the CEA. Chris has already addressed the comments and made a few updates to the air section. I forgot to mention yesterday that Kimi helped with the climate change part of the CEA.

Thanks!

Valois

That would be great! I really appreciate that offer. Your work load is pretty heavy, too. Are you sure you are ok with working this into your schedule?

Hi- don't worry about drafting that part. You've got enough to worry about. I think this is something we can work on together and I can take the first try at it. Does that sound ok?

OK. Thanks for that recommendation. I will get started on that.

Hi Erin,
Attached is the second draft ROD.

Ex. 5 AC/DP

Thanks for looking this over!
